

Mirrors

When to use

Change of speed – Before any manoeuvre – Junction – Roundabout

Parked cars

Traffic lights – Pedestrian Crossing – Changing Lanes – Overtaking Etc...

On a straight road approx every 10 seconds

Why use

To be fully aware of any other traffic ALL around

How to use

Use in pairs

Because of position – get 2 different views

Because of type of glass – get 2 different angles

Types of Glass

Centre mirror – Flat gives a more accurate idea of distance

Door mirrors – Convex gives a wider angle of vision

Vehicles Behind Too Close

Allow more time for manoeuvre

Slow down make enough distance for an Emergency Stop

Anti Dazzle

Adjust lever
